APPLICANT AGREES TO THE FOLLOWING RULES:

1. Permit Application processing will take a minimum of 48 hours to complete after approval of construction plans and to provide an approved or denied permit application to applicant. Person submitting the application is required to check with permitting agency to determine status of permit application.
2. Two sets of construction plans or drawings must accompany the application. Plans should be accurate and drawn to scale of 1 inch = 40 feet. No engineer's seal on drawing will be required at this time. Construction plan or drawing must be submitted to the Town for review and approval no less than fifteen days prior to the planned date of construction.
3. Additional Permit Guidance and Restrictions are attached to this permit application for the information and use of applicant.
4. **Permit must be kept at job site.**
5. Applicant understands that a minimum of 95% compaction is required within the right-of-way.
6. All work shall be inspected by the Town's Inspector before the Contractor leaves a completed job site. The Town requires a four-hour notice of an impending inspection.
7. Any soils testing required will be paid by the permit holder. Applicant shall indemnify and forever hold the Town harmless against each and every claim, demand or cause of action that may be made or come against it by reason of, or in any way arising out of the closing, blocking, excavating, cutting, tunneling, or other work by the applicant under permit from the Town, if such permit is granted.
8. No open cutting in the Town of Argyle will be allowed unless approved by the Public Works Department and authorized in writing. Contractor will not cut or damage street pavement.
9. Compliance with attached Town of Argyle Permit Guidance and Restrictions and all notification requirements dictated by State Law (1-800-DIG-TESS) is required. Failure to comply will automatically void this permit. This permit will expire in 90 days from the date of the issuance of this permit.
